WEF	World Economic Forum
WHO	World Health Organization
WTO	World Trade Organization
WTTC	World Travel & Tourism Council

Remarks by the Statistician- General

The 2030 Agenda for Sustainable Development reflects a shared global commitment to addressing the economic, social, and environmental challenges facing our societies and to fostering a more inclusive, prosperous, and sustainable future. Namibia remains committed to the Agenda and to achieving the 17 Sustainable Development Goals (SDGs) by integrating sustainable development priorities into national development planning and implementation.

Achieving the Sustainable Development Goals (SDGs) depends fundamentally on reliable, timely statistics. Such statistics provide the evidence needed to understand our population's circumstances, assess progress, identify areas of inequality and vulnerability, and inform sound policymaking, planning, and resource allocation. As Namibia approaches 2030, strengthening this evidence base becomes increasingly critical.

Although progress has been made in strengthening SDGs monitoring, significant challenges remain. Gaps in data availability, timeliness, quality, and disaggregation continue to impede comprehensive monitoring of certain SDG indicators and targets. Addressing these gaps requires sustained investment in statistical systems, stronger administrative data, improved coordination among data producers, enhanced statistical capacity, and continued innovation in producing and disseminating statistics.

The NSA recognizes that SDG monitoring is a shared responsibility across the National Statistics System (NSS). Accordingly, I encourage all Offices, Ministries, and Agencies (OMAs), development partners, and other stakeholders to continue strengthening the production, management, sharing, and use of statistics. Particular attention should be given to improving the regularity and quality of data submissions and addressing identified gaps, thereby enabling Namibia to rely increasingly on a comprehensive and timely evidence base for development decision-making.

I wish to express my sincere appreciation to all institutions and stakeholders that contributed data, technical expertise, and input to the development of the 2025 SDG Indicator Framework. I also acknowledge our development partners' continued support in strengthening Namibia's statistical capacity and SDG monitoring systems.

As we approach 2030, let us use statistics not only to measure the progress we have made but also to guide the actions required to accelerate progress in areas of greatest need. I am confident that this framework will serve as a valuable resource for evidence-based planning, policy formulation, monitoring, and decision-making, and will support Namibia's ongoing efforts to achieve the Sustainable Development Goals. Come the year 2030.

ALEX SHIMUAFENI
STATISTICIAN GENERAL & CEO

Office of the Statistician-General
Namibia Statistics Agency

1. Introduction

Namibia is committed to implementing the 2030 Agenda for Sustainable Development and its 17 Sustainable Development Goals (SDGs). These goals provide a global framework for addressing economic, social, and environmental priorities and are integrated into Namibia's national development and sectoral plans. Effective monitoring of progress toward the SDGs depends on reliable, timely, and high-quality statistics from private and public sectors within the National Statistics System (NSS).

As Namibia's national statistical authority and custodian of official statistics, the Namibia Statistics Agency (NSA) coordinates the development, monitoring, and reporting of Namibia's progress toward the SDGs. To fulfill this responsibility, the NSA developed the National SDG Indicator Framework (SDG IF) in collaboration with data-producing institutions across the NSS. The Framework provides a common basis for assessing data availability and tracking progress toward the goals. The first National SDG Indicator Framework was published in 2019, aligning global SDG indicators with Namibia's Fifth National Development Plan (NDP5). This Framework set the national baseline and marked Namibia's departure point on its trajectory toward 2030. The 2019 baseline SDG IF was followed by an updated framework produced and issued in 2021.

The 2025 SDG Indicator Framework therefore builds on these earlier successes by incorporating revisions to the global indicator framework, updated definitions and methodologies, newly available national data, and information from national data producers. It also documents changes to indicator definitions, data sources, methodologies, disaggregation, and data availability, providing continued evidence for policymakers, planners, statistical producers, development partners, and other stakeholders. Furthermore, the statistical information in this report helps assess progress, identify data gaps, and strengthen national statistical capacity and SDG implementation in the country.

2. Data Collection Process

The data collection process for the 2025 SDG Indicator Framework was conducted from October 2024 to April 2025. This collaborative effort involved all relevant sectors, represented by line ministries, agencies, and offices (OMAs). The United Nations-developed indicator metadata guided data collection and assessment, providing definitions, concepts, methodologies, and data requirements for the respective SDG indicators. The process also considered the nationalization of SDG indicators to ensure that those selected and reported for Namibia were relevant to the national context and, where possible, aligned with data that could feasibly be produced within the NSS. The data collection process followed a three-stage approach as follows:

2.1. First, an extensive desktop review of publicly available data from national and international sources was carried out to identify information relevant to the SDG indicators. This was followed by an assessment of available data applicable to the metadata requirements for each indicator. Where internationally defined indicators were insufficiently aligned with Namibia's existing data sources or production capacity, the nationalization process was applied to identify appropriate national indicators or measures that provide meaningful evidence of progress in the Namibian context.

2.2. Second, official requests were sent to the Executive Directors and heads of OMAs to obtain relevant data for SDG indicators not available in the public domain. These requests were complemented by direct follow-ups and consultations with OMAs to establish the data's origin, understand the methodologies used to produce it, and assess its quality and suitability for SDG reporting.

2.3. Lastly, a validation workshop was convened, bringing together relevant stakeholders to review and validate the data, indicator definitions, sources, and reported values. This process enabled OMAs and other stakeholders to confirm the accuracy and relevance of the data and to address outstanding data gaps and inconsistencies before finalizing the 2025 SDGs Indicator Framework.

3. Changes to the SDGs Indicators Framework

3.1. Updating of Indicators at global level

Since adopting the SDGs, the United Nations has periodically revised the global SDG indicator framework to reflect evolving methodologies, definitions, and data requirements. These changes have been incorporated into Namibia's national SDG Indicator Framework to ensure continued alignment with the global framework. Between 2021 and 2024, 8 indicators were refined to improve clarity and consistency. The refinements reflected changes to indicator definitions, methodologies, data sources, and metadata. These adjustments help ensure that the indicators remain relevant and accurately reflect the intended areas of measurement, but they did not alter the meaning of the indicators. Between the 2020 Comprehensive Review and 2024, only one indicator was added, 11.5.3 in 2023. The table below reflects these changes:

Table 3.1: List of indicators with a refined international definition.

SDG Goal	Previous indicator	Refined indicator
Goal 1	**1.a.1** Total official development assistance (ODA) grants from all donors that focus on poverty reduction as a share of the recipient country's gross national income.	**1.a.1** Total official development assistance grants that focus on poverty reduction as a share of the recipient country's gross national income.
Goal 4	**4.b.1** Volume of official development assistance flows for scholarships by sector and type of study.	**4.b.1** Volume of official development assistance flows for scholarships.
Goal 17	**17.4.1** Debt service as a proportion of exports of goods and services.	**17.4.1** Debt service as a proportion of exports of goods, services and primary income.

3.2. Updating indicators' origin to reflect changes in data availability for Namibia.

Namibia's national Sustainable Development Goal (SDG) monitoring data are derived from three sources:

a) **National:** Data originate at the national level, and the indicator is compiled nationally.
b) **International – National:** The data originate nationally but are compiled at the international level using the organization's own statistical model.
c) **International:** The data originate outside the country, and the organization compiles them at the international level. Several SDG indicators have transitioned from international to national sources, reflecting improved data availability and Namibia's reporting capacity. This transition indicates that these indicators are now obtained directly from national data producers rather than from international organizations. It also reinforces national ownership of SDG monitoring and increases reliance on country-specific data.

Table 3.2: List of indicators with changed origin

SDG Goal	Indicator	Previous Origin	New Origin
Goal 3	**3.3.1** Number of new HIV infections per 1,000 uninfected population, by sex, age and key populations.	International	National
Goal 5	**5.5.1** Proportion of seats held by women in (a) national parliaments and (b) local governments.	International	National
Goal 6	**6.3.1** Proportion of domestic and industrial wastewater flows safely treated.	International	National

3.3 Updating indicators' tier classification to reflect changes in the Global SDGs Indicator Framework

The UN uses tier classifications to indicate the methodological development of an indicator and the availability of global-level data. Further information is available in the Namibia 2019 SDGs Baseline Report and on the UN website. Since 2019, the UN has revised the tier classifications of 106 indicators. In most cases, indicators have been upgraded from a lower to a higher tier. Table 3.3 presents a set of indicators whose tier classifications changed between 2021 and 2024.

Table 3.3: List of indicators with changed tiers

SDG Goal	Indicator	Previous Tier	New Tier (Dec 2024)
Goal 1	**1.3.1** Proportion of population covered by social protection floors/systems, by sex, distinguishing children, unemployed persons, older persons, persons with disabilities, pregnant women, newborns, work-injury victims and the poor and the vulnerable	Tier II	Tier I
	1.5.2 Direct economic loss attributed to disasters in relation to global gross domestic product (GDP)	Tier II	Tier I
Goal 4	**4.1.1** Proportion of children and young people (a) in grades 2/3; (b) at the end of primary; and (c) at the end of lower secondary achieving at least a minimum proficiency level in (i) reading and (ii) mathematics, by sex	Tier I	Tier I (b, c)/Tier II (a)

4. SDGs Monitoring Capacity in Namibia

4.1 Revisions to the 2021 SDGs Reporting

In compliance with national statistical standards, the SDG Indicator Framework is subject to revision whenever new information from data sources becomes available. Accordingly, SDGs statistics are revised every second year to incorporate additional information from the UN Global Framework and national data sources, as well as changes and refinements to national indicator definitions as they become available. These changes have resulted in the revision of the following tables 4.1 below. The outcome indicates downward revisions to most indicators, except for those in Goal 13, which were revised upwards. Similarly, Namibia's reporting capacity was revised downward to 66.8 percent in 2025 from 85.8 percent in 2021 (an 19.0-percentage-point reduction).

Table 4.1: Revised Namibia SDG Indicators Capacity for 2021

	Figures as reported in 2021			Updated Figures for 2021		
Goals	**Overall SDGs**	**Namibia Reported**	**Percent Reported**	**Overall SDGs**	**Namibia Reported**	**Percent Reported**
Goal 1. No Poverty	13	13	100.0	13	10	76.9
Goal 2. Zero Hunger	14	14	100.0	14	10	71.4
Goal 3. Good Health and Well-being	28	26	92.9	28	14	50.0
Goal 4. Quality Education	12	9	75.0	12	9	75.0
Goal 5. Gender Equality	14	12	85.7	14	6	42.9
Goal 6. Clean Water and Sanitation	11	10	90.9	11	8	72.7
Goal 7. Affordable and Clean Energy	6	6	100.0	6	5	83.3
Goal 8. Decent Work and Economic Growth	16	15	93.8	16	14	87.5
Goal 9. Industry, Innovation and Infrastructure	12	11	91.7	12	8	66.7
Goal 10. Reduced Inequalities	14	12	85.7	14	10	71.4
Goal 11. Sustainable Cities and Communities	14	9	64.3	14	4	28.6
Goal 12. Responsible Consumption and Production	13	9	69.2	13	9	69.2
Goal 13. Climate Action	8	4	50.0	8	6	75.0
Goal 14. Life Below Water	10	9	90.0	10	8	80.0
Goal 15. Life on Land	14	14	100.0	14	12	85.7
Goal 16. Peace, Justice and Strong Institutions	24	17	70.8	24	11	45.8
Goal 17. Partnerships for the Goals	24	22	91.7	24	21	87.5
Total	**247**	**212**	**85.8**	**247**	**165**	**66.8**

Table 4.2: Revised Indicators Tier Classification for 2021

Tier Classification	Figures as reported in 2021			Updated Figures for 2021		
	Global Indicators	Namibia	Coverage (%)	Global Indicators	Namibia	Coverage (%)
Tier I	136	130	95.6	136	100	73.5
Tier II	107	80	74.8	107	61	57.9
Tier III	0	0	0.0	0	0	0.0
Composite	4	2	50.0	4	4	100.0
Total	**247**	**212**	**85.8**	**247**	**165**	**66.8**

4.2. SDGs reporting

Under the 2025 SDG Indicator Framework, Namibia can report on 176 of the 248 global SDG indicators, representing 71 percent coverage. This figure includes indicators for which at least one data point is available over time. Under the 2019 SDG Indicator Framework, Namibia could report on only 162 of the 244 indicators (66.4%). Accordingly, coverage has improved substantially since 2019. Table 4.3 provides a detailed overview of Namibia's local SDG coverage.

Table 4.3: Namibia SDG Indicators Capacity

	2019			2021			2025		
Goals	Overall SDGs	Namibia Reported	Percent Reported	Overall SDGs	Namibia Reported	Percent Reported	Overall SDGs	Namibia Reported	Percent Reported
Goal 1. No Poverty	14	9	64.3	13	10	76.9	13	11	84.6
Goal 2. Zero Hunger	13	11	84.6	14	10	71.4	14	11	78.6
Goal 3. Good Health and Well-being	27	23	85.2	28	14	50.0	28	20	71.4
Goal 4. Quality Education	11	7	63.6	12	9	75.0	12	10	83.3
Goal 5. Gender Equality	14	9	64.3	14	6	42.9	14	9	64.3
Goal 6. Clean Water and Sanitation	11	7	63.6	11	8	72.7	11	10	90.9
Goal 7. Affordable and Clean Energy	6	4	66.7	6	5	83.3	6	6	100.0
Goal 8. Decent Work and Economic Growth	17	13	76.5	16	14	87.5	16	10	62.5
Goal 9. Industry, Innovation and Infrastructure	12	10	83.3	12	8	66.7	12	9	75.0
Goal 10. Reduced Inequalities	11	7	63.6	14	10	71.4	14	9	64.3
Goal 11. Sustainable Cities and Communities	15	8	53.3	14	4	28.6	15	6	40.0
Goal 12. Responsible Consumption and Production	13	3	23.1	13	9	69.2	13	7	53.8
Goal 13. Climate Action	8	5	62.5	8	6	75.0	8	6	75.0
Goal 14. Life Below Water	10	4	40.0	10	8	80.0	10	7	70.0
Goal 15. Life on Land	14	13	92.9	14	12	85.7	14	10	71.4
Goal 16. Peace, Justice and Strong Institutions	23	11	47.8	24	11	45.8	24	13	54.2
Goal 17. Partnerships for the Goals	25	18	72.0	24	21	87.5	24	22	91.7
Total	**244**	**162**	**66.4**	**247**	**165**	**66.8**	**248**	**176**	**71.0**

4.3. Indicators Tier Classification

As noted previously, the tier classification follows the Global SDG Indicator Framework. Indicators assigned multiple tier classifications are grouped under the “Composite” category, as different components of a single indicator may correspond to different tiers.

As anticipated, data availability is particularly high for Tier I indicators, for which methodologies are established, and many countries regularly produce data. In 2025, Namibia reported on 135 Tier I indicators, demonstrating strong data availability and reporting capacity for indicators in this tier.

Table 4.4: Indicators Tier Classification

Tier Classification	2019			2021			2025		
	Global Indicators	Namibia	Coverage (%)	Global Indicators	Namibia	Coverage (%)	Global Indicators	Namibia	Coverage (%)
Tier I	97	86	88.7	136	100	73.5	170	135	79.4
Tier II	71	49	69.0	107	61	57.0	70	37	52.9
Tier III	70	22	31.4	0	0	0.0	0	0	0.0
Composite	6	5	83.3	4	4	100.0	8	4	50
Total	244	162	66.4	247	165	66.8	248	176	71

4.4. Data origin and National Data provider

Figure 1 presents the data sources for the SDG indicators reported for Namibia across the three reporting years. In 2025, national sources provide data for most indicators (60.8%). International sources using national data provide data for 7.4% of indicators, while international sources using international data account for 31.8%. Compared with the 2019 SDG Indicator Framework, there has been a shift toward international sources using international data. This indicates that some of the progress reported for the SDGs (see Section 4.3) reflects increased data availability at the global level.

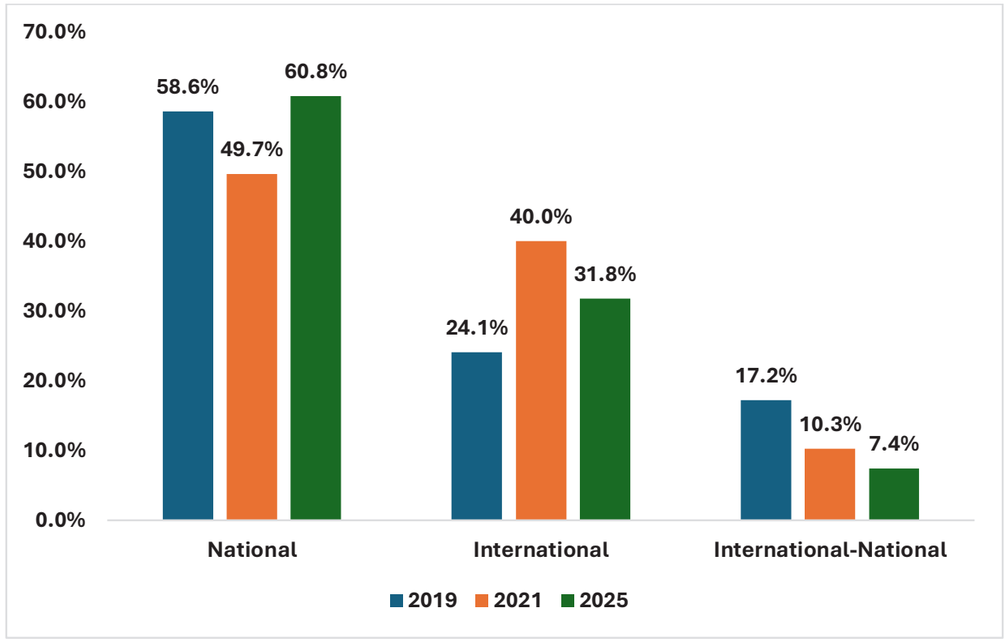

Figure 1: Source of indicators available for Namibia

Table 4.5 presents the primary national data providers for indicators derived from national sources. It includes only providers that supply data for at least four indicators. In total, more than 20 national institutions contribute data to the National SDGs Indicator Framework. For the 2025 IF, the listed providers are the NSA (45.8%), the MOHSS (21.5%), MAFWLR (14%), the MEFT (10.3%), and OPM (10.3%).

Table 4.5: Main National data providers in Namibia

National Data provider	Percent of National indicators provided		
	2019	2021	2025
Namibia Statistics Agency	37.9	30.6	45.8
Ministry of Health and Social Services	15.8	15.3	21.5
Ministry of Environment, Forestry and Tourism	13.7	10.8	10.3
Ministry of Education, Art C	5.3	5.4	4.6
MFMR	3.2	5.4	-
OPM	6.3	5.4	10.3
MAFWLR	-	3.6	14
NAMPOL	-	3.6	3.7
BoN	-	-	6.5

4.5 Level of Data Disaggregation

A core principle of SDG monitoring is ensuring that no one is left behind in implementing the SDGs. This requires tracking changes at the most granular level of disaggregation, particularly among society's most vulnerable groups. Collecting highly disaggregated data is essential to establishing a comprehensive SDG monitoring system. Since 2019, Namibia has developed a standard for measuring "Leave No One Behind" (LNOB) in the Namibian context. The standard's first version was published in 2020 (NSA, 2020), following comprehensive consultation with relevant national stakeholders. It applies to all data producers within the National Statistics System and identifies 13 key variables, including age, citizenship, disability, marital status, educational attainment, and sex, that should be incorporated into all data collection instruments for surveys, censuses, and administrative data in Namibia.

Given the recent development of the LNOB standard, data remain limited for many of the identified disaggregation criteria. To maintain consistency with the approach used in the 2019 SDG Indicator Framework, this update focuses primarily on the three levels of disaggregation for which data are most commonly available: (1) sex (male/female), (2) area of residence (urban/rural), and (3) region. Other disaggregation levels will be included in the next update, following the release of most thematic reports on the 2023 Population and Housing Census data.

Table 4.6: Levels of disaggregation available for Namibia

Type	2019	2021	2025
Sex (Male, female)	47.5%	48%	74.3%
Area (Urban, Rural)	34.8%	29%	39.5%
Regions	27.1%	24%	30%

5. Progress of SDGs Monitoring in Namibia

Since adopting the 2030 Agenda, Namibia has made significant progress in strengthening the institutional framework and data systems needed to monitor the Sustainable Development Goals (SDGs). The Namibia Statistics Agency (NSA) has played a central role in coordinating SDG data collection, compilation, validation, and reporting, in collaboration with Ministries, Offices, Agencies, and other data producers within the NSS. The development and periodic updating of the SDG Indicator Framework have improved the availability of nationally relevant indicators and provided a structured basis for tracking progress toward the 17 SDGs. Over the years, Namibia has also seen improved data availability, with more indicators supported by national data sources and regularly reported.

6. Challenges in SDGs reporting

Despite this progress, significant challenges remain, particularly in addressing data gaps, improving the timeliness and quality of statistics, strengthening data disaggregation, and ensuring sustainable institutional capacity for ongoing monitoring and reporting of the SDGs. Other challenges are as follows:

6.1. The absence of data management systems and skilled statisticians within the NSS remains a significant challenge to ensuring that data requested from NSS data providers are submitted accurately and on time.

6.2. Coordination and institutional commitment remain significant challenges to effective SDGs reporting. Producing SDGs data depends on the active participation of multiple data-producing institutions within the NSS, whose reporting responsibilities may compete with other institutional priorities. Delayed responses to data requests, limited participation in validation processes, and insufficient resources for statistical activities can hinder the timely compilation and updating of the SDG Indicator Framework.

6.3. Another challenge is the limited availability of highly disaggregated data needed to assess progress toward the SDG targets. Although Namibia has developed a standard for measuring the “Leave No One Behind” principle, the standard's application and the availability of data for all recommended disaggregation variables remain limited.

Addressing these challenges will require sustained investment in statistical capacity, enhanced coordination across the National Statistics System, strengthened administrative data systems, and expanded use of innovative data sources to ensure the timely production of reliable, disaggregated, and policy-relevant SDG statistics.

SDGs IF 2025 summary Table

SDG GOAL	SDG TARGETS	Indicator	Indicator Description	Tier (December 2024)	Ind Group	Data Provider	Origin	National Definition	Unit	Baseline				Indicator Framework 2019				Indictor Framework 2021				Indictor Framework 2025
